

# BATHYMETRIC SURVEYS

## ADVANCED BATHYMETRIC MAPPING.

Combining singlebeam and multibeam echosounding data to create high resolution-underwater surfaces. Applications include, pipeline integrity inspection, hydrotechnical inspection dredge volumes, sinkhole and construction layouts.

### Fleet of watercrafts

MSI has various sized watercraft and propulsion to allow safe completion of projects in any watercourse in Western Canada.

### Single and Multibeam Echosounders

Multiple sounder options allows MSI to complete a full range of scopes and fit to your requirements.

### Multiple deliverables

Completed deliverables range from topographic maps to interactive 3D models of the surface.

## Leading the Industry

Please visit our webpage for more information or contact MSI to discuss your project.
